Detail Introduction :

Toffee Making Plant

Toffee Making Plant is the ideal tool to produce toffee for the diversified needs of the confectionery market, with a full range of functions to produce hard and soft toffee with or without a sandwich, with the possibility to change the shape and size of the toffee by changing the molds, in compliance with GMP certification. It is a necessary machine to produce toffee to the satisfaction of our customers.

Toffee Making Plant production line.

Toffee Making Plant production line.	
1	With servo drive and PLC control system
2	Suitable for sandwich toffee chocolates
3	Different capacity lines are available
4	With silicone mold release device

Toffee Candy Machine assembly accessories.

1. Preheating tank. Made of 304 food-grade stainless steel, using the steam heating method for preheating, capacity 300L.
2. Toffee Candy Cookware. Made of 304 food-grade stainless steel, steam with control valve heating temperature at 0-130 degrees Celsius.
3. Servo drive. Made of 304 food-grade stainless steel, oil heating, with two independent hoppers

speed up to 40-55n per minute.

Toffee Manufacturing Machine uses and features.

Toffee Manufacturing Machine uses and features.	
Application	It is suitable for the production of hard candy, sandy milk candy, toffee, and sandwich-type candy, also can be used for the production of crispy candy. The shape can be customized according to customers' requirements, such as spherical, flat circle, oval, and many kinds of abnormal shapes.
Features	Unique design closed die, one-time stamping, and molding can produce sandwich toffee (milk candy), non-sandwich toffee (hard candy). Solve the problem of irregular shape in the production of the original chain molding machine. Stamping and forming, smooth operation, high toffee yield. Adopting thickened 304 stainless steel plate, the stirring method adopts special inclined transmission, which makes the stirrer fully contact with the pot and has no stirring dead angle. The sealed structure ensures clean, neat, and sanitary, and the frequency-controlled power makes the operation smoother. Free dismantling device saves manpower, reduce labor intensity, and liberate labor cost.

Advantages of Toffee Candy Making Machine.

Advantages of Toffee Candy Making Machine.	
1	Sugar and all other ingredients can be automatically weighed and transferred to the dissolving tank. Different toffee recipes can be programmed on the automatic control system for easy adjustment and display.
2	The automatic control system, touch screen, servo drive, and motor are made of world-famous brands, more reliable, more stable performance, and longer service life.
3	Settling weight can be easily adjusted on the touch screen.
4	Multi-language touch screen programs can be designed.

YOUR RELIABLE
BUSINESS PARTNER!
